### Commonwealth Day 2021

Once again, we are able to celebrate Commonwealth Day.

Despite the fact that this year we are unable to gather for this special annual celebration, it is important for us to remember all that it represents.

It is now 72 years since the modern Commonwealth came into being and it is a unique partnership of which each nation should be proud. Together we have more diversity, more breadth of skills and culture than almost any other organisation on Earth.

As we recover from the Covid-19 pandemic, our partnership will help us to live fulfilling and productive lives, again. As a world-wide family we can help each other to prosper and to nurture and care for our world for the future.
